### **EXAMINER'S AMENDMENT**

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Theodore M. Magee (Reg. No. 39,758) on 12/07/2004. The application has been amended as follows:

Claims 1, 3-6, 9, 21-22, and 24 are cancelled in the instant examiner's amendment. The applicant has cancelled claims 2, 7-8, 10, 13, 16, 23, and 25-30 in the after final amendment filed 09/02/2004. Thus in total, claims 1-10, 13, 16, 21-30 are cancelled. The newly added claims (also from the after final amendment filed 09/02/04) are entered.

2. The following is an examiner's statement of reasons for allowance:

The instant application is directed to a unique way of rendering images on a computer screen. It is well known in the art to transform the base image in order to display different versions of the base image, but this requires extra image processing power and storage for storing all the versions of the base image. The instant invention improves upon this standard rendering method by transforming the path representing the images and not the images themselves. This avoids the extra memory storage requirements and allows the display system to quickly produce a plurality of versions of base images. The remaining claims as

amended in the instant examiner's amendment recites specific method of transforming the path representing the images, which are not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hwa C Lee whose telephone number is 703-305-8987. The examiner can normally be reached on M-F 8:00-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Razavi can be reached on 703-305-4713. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system.
